DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26, 29 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent No. 5,731,241 to Jang et al.

Regarding claim 26, Jang et al. teaches a semiconductor structure, comprising:
a support (10);

a first material (20) with a first etch rate on the support;

a trench formed through the first material and into the support;

a trench filler material (40) deposited in the trench, the filler material having an etch rate that is inherently less than 1.2 times the first etch rate, since the materials are the same as that disclosed in the instant application; and

wherein the first material and trench filler material are etched simultaneously across the trench (Figs. 2-3, Col. 7, lines 18-25).

Jang et al. does not teach depositing the first material, but instead thermally grows the first material. The requirement of depositing the first material is considered a product-by-process limitation. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the

Art Unit: 2811

product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

Regarding claims 29 and 30, Jang et al. teaches a semiconductor structure, wherein the trench filler material is TEOS or CVD deposited oxide (Col. 2, lines 61-63).

3. Claims 27 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 26-30 have been considered but are moot in view of the new ground(s) of rejection.
